

Developer Rainforest Plantings – Lennox Head

**Plate 1:** - Lennox Head rainforest planting conducted in September 2014

**Plate 2:** Planting area depicted in Plate 1, as at 1 July 2016.  
Note: Plantings are now reaching a height of 3-5m and developing a closed canopy.

Rainforest Plantings along T2E Highway alignment

**Plate 3:** T2E rainforest batter as at 28 July 2015. Batter was planted mid-2014.

**Plate 4:** T2E rainforest batter depicted in Plate 3, as at 1 July 2016.  
Note: Plant growth along the batter is poor with a large number of plant losses.

**Plate 5:** T2E Lowland rainforest plantings undertaken November 2014, as at 28 July 2015.

**Plate 6:** T2E Lowland rainforest plantings depicted in Plate 5, as at 1 July 2016.  
Note: These plantings have poor growth and are not expected to develop. Large areas of the required site remain unplanted and are inconsistent with the UDLMP.

**Plate 7:** Skinners Creek as at 1 July 2016.

Note: This area is devoid of any riparian rainforest, despite the area being planted out in 2015. The invasive grass species *Setaria* has out-competed the native rainforest plantings.
