- LEGEND**
- Proposed shared path (asphalt surface, width as shown)
 - Existing shared path
 - Proposed finger path (surface and width as shown)
 - Proposed timber boardwalk or bridge (width as shown)
 - Proposed walking path (surface and width as shown)
 - Existing walking path
 - Grade exceeds recommended limit shared path > 5% (AS1428 and Austroads 6a) walking path > 10% (AS2156)

Install timber platform "lookout" at suitable location on existing views south over Sharpes Beach.

Maintain existing grass cover over gravel of outfall access road. Monitor condition of path as traffic increases over time and upgrade to consolidated gravel only when current path deteriorates.

Ch 2940 to 3100. Provide 2.0 m consolidated gravel path to link to existing STP outfall access road. Allow grass to cover track to provide similar appearance to STP outfall access track.

Install timber platform "lookout" at suitable location near small pandanus grove. Control erosion and informal access.

Path to be shared path standard from Sharpes Beach car park to proposed lookout. Provide link with existing underpass.

Provide 2 x waymarking signs on single pole orientated on path alignment.
 North - Boulder Beach Car Park 1.5 km
 South - Flat Rock Car Park 1 km

2.0 m wide walking path separated from car park by timber bollards.

Detailed design of path to include active revegetation and small open space areas for passive recreation.

Walking path
 2.0 m wide earth steps on oblique curve
 Walking path
 2.0 m wide consolidated gravel path
 Walking path
 Existing path - STP outfall access track
 Walking path
 2.5 m wide asphalt path
 Separated shared path
 Roadside walking path
 2.5 m wide widened shoulder
 Walking path
 2.0 m wide consolidated gravel path

NOTE - Ch. 470 to 440
 Upgrades of existing path must avoid any impact on littoral rainforest species, native vegetation, dune integrity and dry stone wall immediately west of path. Adequate benching for widening of path to be provided by extending batter east from face of dune and providing rock revetment above existing boulder field as necessary for coastal hazard mitigation.
